

Service Dog Information

Student Health Services welcomes service dogs. Emotional support or therapy animals are not allowed in this facility.

If we are uncertain if your dog is a service animal, we may ask you two questions:

1. Is the animal required because of a disability?
2. What work or task has the animal been trained to perform?

We will not ask you the nature of your disability, for certification of the animal, or to have the animal demonstrate this task.

The dog may have access to all areas except to those where we need to maintain extra cleanliness such as our medical procedure rooms.

Service dogs are typically very well behaved. However, we will ask you to remove the dog if:

- It becomes disruptive, aggressive or
- Soils in the facility

If you are allergic to dogs, please inform our staff so that we can make arrangements to minimize your exposure.
